ARTIST USER GUIDE / 01

Your music. Your page. Your next step.

50B Entertainment | A simple guide for artists and DJs
Edition: November 9, 2026

Start here

This guide walks you through joining, building your artist page, adding a picture, uploading music, and sharing your page. Take one step at a time. You can save a draft and return later.

OPEN YOUR ARTIST STUDIO

NEW ARTIST? START YOUR ACCOUNT

OPEN YOUR PROFILE SETUP

Have these ready

- [ ] Your artist or stage name and a short bio.
- [ ] A picture or logo, saved on your phone or computer.
- [ ] Your final song file and, if available, its cover art.
- [ ] One email, phone number, or website you want fans to see.

The most important habit

Choosing a file shows a preview. It does not save the picture by itself. Always select **Save profile** or **Upload song** and wait for confirmation.

ARTIST USER GUIDE / 02

Join and sign in

Use the same account each time so your artist page stays with you.

1 **Open the artist studio**
Use the link below. If you are not signed in, complete the sign-in method offered on the site.

2 **Choose Artist / DJ when shown**
On the member login screen, choose **Artist / DJ - My studio**, then sign in. If you do not have an artist account, you will be taken to the artist signup.

3 **Complete the artist signup**
Enter your stage name, genre, and a short description. Review the artist terms. If you agree, check the box and continue.

SIGN IN TO YOUR ARTIST STUDIO

One membership for everyone

$49/year full access: listeners, artists and DJs all pay the same price for the music and jukebox. Artist / DJ profile tools, pictures and music uploads are included. There is no separate DJ plan or profile add-on.

The Black Friday price stays available until 50B changes it. Paid billing starts at signup and renews at **$49 each year until canceled**. Manage cancellation in your membership dashboard.

Already paid? Use the same account. Older subscriptions keep their existing billing until canceled. Cancel an older plan before switching; wait until its paid access ends to join the new plan.

Already paid but still locked? Return from Square and use the payment-check link shown on your return page. A receipt or a checkout redirect alone may not mean that activation has been verified.

ARTIST USER GUIDE / 03

Tell fans who you are

Open the profile setup, then follow its numbered sections.

OPEN PROFILE SETUP

1 **Step 1: Your name and story**
Enter your display name. Choose **Artist**, **DJ**, or **Artist & DJ**. Write a short bio about your sound, hometown, and what listeners can expect.

2 **Keep your bio simple**
Two or three clear sentences are enough to start. You can edit them later.

Example bio - replace this with your own

I am an R&B artist from Houston. My music tells stories about love, life, and growth. Follow my page for new releases and booking information.

3 **Step 3: Public contacts**
Add at least one public booking email, phone number, or website before publishing. A website must include **https://**.

4 **Save your progress**
You can select **Save profile** with Publish unchecked to keep an unfinished text draft. Add a bio and a contact method before making the page public.

Choose public details carefully

Your account email stays private unless you also enter it as a public contact. Only add details you want fans and booking contacts to see.

ARTIST USER GUIDE / 04

Add your picture or logo

Step 2 in the profile setup is called "Add your picture or logo."

GO TO PICTURE UPLOAD

1. **Check the membership message**
   If picture upload is locked, open the membership status and activation options above the form. Your active full-access membership includes pictures and publishing.

2. **Choose your picture**
   Select **Choose picture from your device**. Find a JPG, PNG, or WebP image in Photos, Downloads, or your computer files. You may add a logo in the separate logo box.

3. **Wait for the preview**
   The site prepares supported large photos up to **20 MB** and resizes them when needed. Wait until the picture is ready. A square or portrait picture works well.

4. **Select Save profile**
   Go to Step 4 and select **Save profile**. Wait for a success message. Open **View my artist page** to check the result after publishing.

iPhone HEIC photo will not open?

HEIC support depends on your browser. If the site cannot read it, export or share a **JPEG copy** from your Photos app, then choose that copy. If a photo is over 20 MB, choose a smaller copy.

If a picture has an error, choose a different file or use "Continue without this new picture" to save your other changes. Choosing a picture only previews it; remember to save.

Publish and check your page

Step 4 is called "Save, publish and check your page."

1. **Check the essentials**
   You need a display name, a bio, at least one public contact method, and active profile access to publish the enhanced page. A picture and logo are optional.

2. **Check the Publish box**
   Check the box to list your completed page in the selected artist or DJ directories. Leave it unchecked if you want to keep a private profile draft.

3. **Select Save profile**
   Wait for the saved-and-published message. If an error appears, read it, correct the named field, and save again.

4. **Open View my artist page**
   Check your name, picture, bio, and contact links. Select Artist or DJ in the directory to see how visitors will find you.

5. **Copy and share your link**
   Copy your own page address from the browser. Share it with fans, promoters, and booking contacts. Your studio also provides music and promotion links.

OPEN SAVE & PUBLISH

Published page not visible?

Confirm Publish is checked and saving finished successfully. The premium page and directory listing are hidden if membership expires or a payment is refunded. Saved details remain in your studio.

ARTIST USER GUIDE / 06

Upload your first single

Open the artist studio and find "Upload your music."

OPEN SONG UPLOAD

1. **Add the song details**
   Enter the artist name and song title. Choose a required music category / genre so the song appears in the right jukebox group.

2. **Choose the final music file**
   Select a downloaded MP3, M4A, WAV, OGG, or supported MP4 file, up to **25 MB**. A link to a song is not the music file.

3. **Add artwork and lyrics if you have them**
   Song cover art can be JPG, PNG, or WebP up to **5 MB**. It is optional for a single. You can paste lyrics or import a timestamped .lrc file; see page 8.

4. **Select Upload song**
   Wait for the upload confirmation. Keep the page open while it works. Do not press Upload repeatedly.

5. **Listen and check**
   Open your artist jukebox or choose **Continue to my artist jukebox** when shown. Play the song and check its title, genre, cover, and lyrics.

If the song is too large

Export a smaller MP3 or M4A, then choose that file. Profile-photo resizing does not resize song files or song covers. Only upload music and artwork you own or have permission to distribute.

ARTIST USER GUIDE / 07

Upload an EP or album

Choose "Upload Full Album" in the artist studio.

OPEN THE ALBUM UPLOADER

1. **Choose the release type**
   An **EP** contains **5-7 songs**. An **album** contains **7-50 songs**. Each track must be no larger than **25 MB**.

2. **Fill in the release details**
   Set your download price, release title, artist name, and genre. Add the required album cover: JPG, PNG, or WebP, up to 5 MB.

3. **Select all the tracks**
   On a computer, select the tracks together in the file picker. Review every title and use the up/down controls to arrange the order before uploading.

4. **Select Upload & publish album**
   Tracks upload one at a time. Leave the page open. The album is published after every track finishes.

5. **If an upload is interrupted**
   Completed tracks are saved. Return to the draft, choose any missing files, then select **Continue & publish album**. Check the published album before sharing it.

Review before you upload

Check the price, cover, titles, and track order first. Some album details are locked once uploading begins. Add any track lyrics before uploading that track, or use your song-lyrics editor afterward.

ARTIST USER GUIDE / 08

Add lyrics that follow the music

A timestamped LRC file tells the player when each lyric line begins.

1 **Create or prepare your lyrics**
Use your exact final lyrics. To get help creating an LRC file, you can use the Manus invitation linked below. Provide your final song audio and ask for a line-by-line timestamped LRC file.

2 **Check the timing**
Listen through and confirm that each line starts at the right time. Save a UTF-8 text file with a **.lrc** ending. Timing depends on the exact recording version.

3 **Import the file**
In the upload form or **Add / edit lyrics** for an existing song, select **Upload timestamped lyrics (.lrc, optional)**. Importing replaces the lyrics text in that form.

4 **Review, then save**
For a new song, select **Upload song**. For an existing song, select **Save lyrics**. Reopen the song to load the update.

LRC example - use your own words and times

[00:12.50] Your first lyric line
[00:18.00] Your next lyric line

The importer accepts files up to **120 KB** and **30,000 characters**. Plain lyrics can also be pasted; their scrolling is estimated.

OPEN MANUS - CREATE TIMESTAMPED LYRICS

ARTIST USER GUIDE / 09

Quick help and your final check

Use the message on the screen to choose your next step.

Picture button is locked
Check profile membership status. An active full-access membership is required for picture uploads.

Picture is selected but not showing on my page
Wait for preparation, select Save profile, then check View my artist page. A preview alone is not a saved upload.

I signed in but cannot find my artist page
Open the Artist Studio link below. Use the same account you used to join. If signup appears again, confirm that you are using the correct account.

I cannot publish
Add a bio and one valid public contact method. Confirm active profile access, check Publish, and save.

Upload failed or connection interrupted
Read the error, check the file limit, and retry. For albums, continue the saved draft instead of starting another release.

Before you share

- [ ] My name, bio, picture, and public contacts look correct.
- [ ] My page is saved and published; my song plays correctly.
- [ ] I copied my own artist or DJ page link.

RETURN TO YOUR ARTIST STUDIO

Need help? Send the 50B site owner your artist name, device/browser, exact error message, and a screenshot of the problem. Do not send passwords, verification codes, or card details.
